PATENT APPLICATION

#8/Arndt C
11/21/01
C. McKinney

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the Application of

Osamu OKUMURA et al.

Group Art Unit: 2871

Application No.: 09/671,354

Examiner: M. Ton

Filed: September 27, 2000

Docket No.: 038959.01

For: REFLECTIVE COLOR LCD WITH COLOR FILTERS
HAVING A PARTICULAR TRANSMISSIVITY

AMENDMENT UNDER 37 C.F.R. §1.111

Director of the U.S. Patent and Trademark Office
Washington, D.C. 20231

Sir:

In reply to the Office Action mailed August 15, 2001, please amend the above-
identified application as follows:

IN THE SPECIFICATION:

Page 6, lines 21-32, delete current paragraph and insert therefor:

07 In order to solve the problems mentioned above, the present invention comprises a pair of substrates having electrodes on the opposing inner faces and having formed matrix-like dot groups, a liquid crystal sandwiched between said substrates, at least two colors of color filters, and at least one polarizing plate. By being configured in this manner, the reflective type liquid crystal device has the advantages of having a higher contrast and being able to display colors more brilliantly compared with the conventional reflective type liquid crystal devices that use a liquid crystal mode not having a polarizing plate.

Page 12, lines 19-26, delete current paragraph and insert therefor:
